

BYLC OPD Begins Corporate Training Expansion with Industry Needs Assessments

December–March, 2026

As part of its expansion into the corporate training space, the BYLC Office of Professional Development (OPD) conducted training needs assessments with partner organizations to better understand industry skill demands. During this process, a focus group discussion was conducted with representatives from Fashion Flow Apparels Ltd. to identify priority competency areas and workforce development needs. Insights gathered from these assessments informed the development of customized training modules, which will support structured program delivery for participating organizations.
